

Introducing the

NxStage® System One™

NxStage is pleased to introduce the latest version of the System One: The System One S. This new version comes with added functionality over the current generation.

The System One S features:

- 18 L/hr dialysate flow rate
- New ergonomic handles
- Same look and feel as current cyclor

With the higher dialysate flow rates offered by the System One S, wider ranges of therapy options are now available. Higher dialysate flow rates may mean the ability to increase clearance, put larger patients on therapy, or decrease treatment time or frequency.

Whether your patients are working professionals, students, or retired, the System One S offers flexible therapy solutions to fit each of their unique lifestyles.

The System One S can provide greater flexibility for your patients that prefer less frequent therapy. It may also provide proven clinical benefits for those patients that wish to dialyze 5 or 6 days per week. The System One S helps deliver a wider range of therapy options for your patients.

The NxStage Dosing Calculator provides

flexible therapy treatment schedules to assist you in prescribing the therapy option that works best for your patients.

System One S— Therapy Options for Every Lifestyle

The System One S combines the reliability of the System One and the added treatment flexibility of high-flow capabilities.

- Compact and portable
- No need for significant electrical, plumbing, or water purification infrastructure changes
- Designed for ease of setup, training, and use
 - » Drop-in cartridge allows for one-step loading and safety system engagement
- Simple, compact PureFlow™ SL water purification system for home use
- Designed for simple maintenance
 - » Easy, wipe down disinfection
- Flexible therapy options to fit your patients' lifestyles
 - » Allows for multiple treatment options and custom therapy prescribed to patient needs
- Dedicated support
 - » Quality clinical education team and materials
 - » 24/7 clinical, technical, and customer support

To learn more about the **NxStage System One S** speak to your local Sales Representative or call **1-866-NxStage (1-866-697-8243)**.

The NxStage System One is a prescription device. All forms of hemodialysis, including treatments performed in-center and at home, involve some risks. In addition, there are certain risks unique to treatment in the home environment. Patients differ and not everyone will experience the reported benefits of more frequent home hemodialysis. Talk to your patients to see if more frequent home hemodialysis with NxStage is right for them.
